

# SORB-SOX

SORB-SOX. THE SPILL STOPS HERE.

INSTANT OIL ABSORBENTS DESIGNED TO CONTAIN AND CLEAN UP SPILLS OF OIL AND OIL-BASED PRODUCTS

## THE ONE-STEP CLEAN-UP SOLUTION

SORB-SOX are powerful oil absorbents wrapped in long socks. Light, compact and easy to maneuver, they are the secret to hassle-free oil clean-up. SORB-SOX can be molded to the shape of any oil spill. Their powerful wicking action draws and retains oil on contact, leaving a clean, dry surface. Once the oil is absorbed, the socks are easily disposed of.

SORB-SOX are the one-step clean-up solution. They are a product you can count on. They're quick. They're easy. And they don't miss a drop.

No more stop-gap solutions. With SORB-SOX you do it once and you do it right – in just one step.

SORB-SOX. You can't afford to be without them.

## THEY'RE VERSATILE

SORB-SOX are available in a number of custom sizes and can be molded to contain virtually any oil or oil-based product.

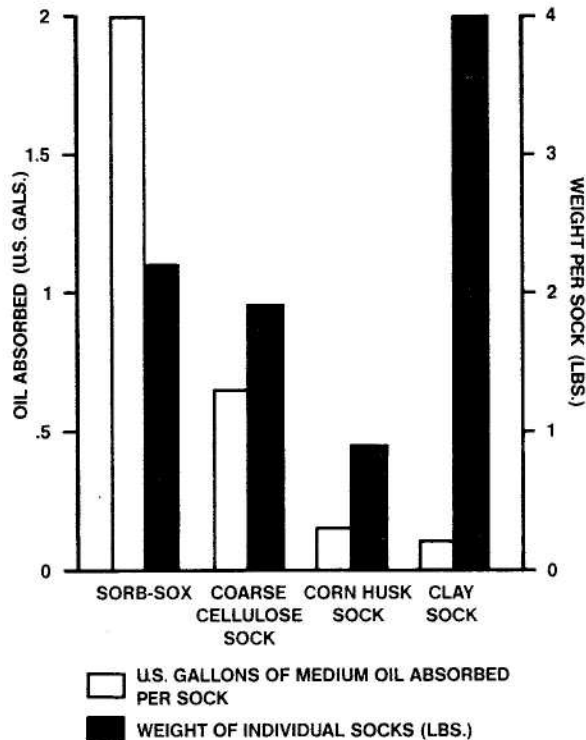

- Wrap them under and around machinery to soak up oil leaks.
- Keep them handy during machine maintenance work.
- Rely on them to instantly contain and absorb spills at the scene of accidents.
- Use them to prevent oil from entering manholes and contaminating sewer systems.

## SEE FOR YOURSELF

SORB-SOX are powerful. More powerful than any other sock on the market. One SORB-SOX alone will absorb 8 litres or 2 U.S. gallons of oil.

Compare SORB-SOX with other absorbent socks on the market.

Based on Canadian General Standard Board approved test methods.

There's no contest. One SORB-SOX will do the work of 10 of the leading corn husk socks. That's quite a difference. Compare the price. Compare the weight. And compare the ease. SORB-SOX are in a class of their own.

## TECHNICAL DATA

Absorption: 8 litres or 2 U.S. gallons per sock

Reaction Time: Instant

Retention: Meet leachate standards

Toxicity: Non-toxic, environmentally safe

Storage: Keep in a dry place indefinitely

Disposal: Incineration or landfill according to government regulations

Products Absorbed: All oil-based liquids, including polychlorinated biphenyls (PCBs), fuel oil, aviation fuel, oil-based drilling fluids, gasoline, motor oil, oil-based paints, crude oil, oil-based inks, vegetable oils.
